SUMMARY

- Over 5-6 years of software experience in design, development and deployment of web-based Client-Server business applications using OOP, Java/J2EE technologies.
- Experience in **Java, JDBC, JavaBeans, Hibernate, Struts, JSP, JavaScript, JFC, Servlets, EJB, and GWT.**
- Experienced in implementing Service Oriented Architecture (SOA) with **XML** based Web Services (**SOAP/UDDI/WSDL**) and REST web services with **Spring** Boot and Micro Services.
- Good experience on **Enterprise Java beans (EJB)** like stateless Session **EJB, MDB, Entity Beans.**
- Skilled at progressing from problem statement to well-documented designs.
- Experience with frameworks like Struts, **Spring, JSF**, AJAX frameworks and ORM frameworks like **Hibernate.**
- Developed reusable and interoperable Web service modules based on SOA architecture using **SOAP, RESTful.**
- Excellent in designing the frontend pages using **JSP, HTML 5, CSS3, Bootstrap** and providing validation using JavaScript, jQuery. Also, developed Dynamic Interactive Web pages using AJAX and its libraries.
- Ability to efficiently translate algorithms, ideas and concepts to software applications.
- Expertise in design with Use Case, Sequence diagrams, Activity diagrams, Class diagrams with exposure to UML, tools like Rational Rose and use of Rational Unified Process (RUP).
- Proficient with all phases of Software Development Life Cycle (SDLC) with ample experience involved in designing, developing, Coding, Debugging, Testing and implementing software applications.
- Hands on Experience in developing Websites using ASP.NET, ADO.NET, ASP.NET MVC and able to perform database transactions using SQL & MySQL Database.
- Having experience with Cloud Computing environment like Amazon Web Services (AWS), Docker Containers.
- Proficient in developing .NET applications in Visual Studio.
- Worked on various architectures like MVC, SOA, Multi-Tier, REST architectures.
- Sound knowledge of object-oriented analysis and design concepts.
- Worked on creating responsive website for Smart devices using responsive design, media queries and **Bootstrap.**
- Expertise in website design with CMS WordPress, Joomla, and Drupal.
- cPanel maintenance and Hosting knowledge in using Web servers.
- Experience in UI/UX design and Expertise Knowledge in Design & Testing, Programming, Assembling and Installation.
- Knowledge in Network Engineering, primarily configuring and troubleshooting
- Experienced with TCP/IP, OSI, Trunk, LAN/WAN, Routers, Switches, Hubs, SSH, DHCP, ARP, VLAN, STP and Access lists.
- Knowledge on wireless standards, traffic load balancing, IPS/IDS and proxy servers besides Windows server infrastructure for AAA, DNS and DHCP maintenance and basic understanding on VMs.
- Avid learner with proven capability to implement new technologies to its detail level.

TECHNICAL SKILLS:

.Net Technologies	C#, MVC 5/4/3, ASP.NET, ADO.NET, SQL, ENTITY FRAMEWORK, XML, Web Services, Windows Services.
Programming Languages	Java, C, C++, PHP, LINQ, PL/SQL, T-SQL, XML
Web Technologies	HTML, CSS, DHTML, Servlets, JSPs, EJB, JNDI, JMS, XML, XSLT, XSD, JSF, jQuery, Ajax, AngularJS, Angular 2, NodeJS, React JS, JSON.
Databases	Microsoft SQL Server 2012/2008R2/2005, T-SQL, DB2, DBMS, My SQL, ORACLE (PL SQL), MS Access 2007/2003
Microsoft Framework	.NET Framework 4.5.1/4.5/4.0/3.5/3.0/2.0
Design Methodologies	OOAD with UML, Design Patterns, Data Flow Diagrams, Flow charts
Tools & IDE	Visual Studio .NET (2013/2012/2008/2005), SharePoint Designer 2007, Adobe Dreamweaver, Adobe Flash, Tableau 9.x, Adobe Photoshop.
Version Control	Microsoft Visual Source Safe (VSS), Team Foundation Server (TFS), GIT HUB/GIT Flow.
Methodologies	Agile, Scrum, RUP, TDD, OOAD, SDLC
Web Servers	Internet Information Server (IIS), Apache, AZURE.
Testing technologies/tools	JUnit, JMeter, HTML Unit

EDUCATION:

Master of Science in Computer Science Information Systems **University of South Alabama.**
Bachelor of Technology in Electrical and Electronics Engineering. **KL University**

PROFESSIONAL EXPERIENCE

HORIZON
Java Developer/ Full Stack Developer

Atlanta, Georgia
May 2018 – Present

Responsibilities:

- Used Agile methodology and actively participated in Scrum meetings to produce quality deliverables within time.
- Involved in the development of user interface applications and professional web applications using **HTML5, CSS3, JavaScript, jQuery, JSON, XML, NodeJS, Bootstrap and AngularJS**
- Implemented functionality like searching, filtering, sorting, validating using **AngularJS** and **Java Script**.
- Developed **AngularJS** custom directives, working on attribute level, element level, class level directives.

- Designed and Developed End to End customer self-service module using annotation-based **Spring MVC, Hibernate, and jQuery**.
- Developed User Interface with JSF, JSP, HTML, JavaScript, jQuery and AJAX.
- Utilized browser compatible programming by using Google Web Toolkit to perform **JavaScript** operations.
- Designed, configured and deployed Amazon Web Services (AWS) for a multitude of applications utilizing the Amazon Cloud formation.
- Used Docker to containerize the Services and APIs to run on EC2 instances.
- Designed and developed Micro Services business components using **Spring Boot**.
- Implemented **Spring Boot** Micro Services to divide the application into various sub-modules.
- Integrated REST API with **Spring** for consuming resources using **Spring Rest** Templates and developed **RESTful** web services interface to **Java**-based runtime engine and accounts.
- Developed and consumed **RESTful** web services to retrieve configuration **JSON** documents related to customer.
- Collaborated with testers and developers and prepared test plans for producing high quality software applications.
- Used JIRA tool for Issue/bug tracking, monitoring of work assignment in the system.
- Developed GIT controls to track and maintain the different version of the project.

Univeristy Of South Alabama
Web Developer

Mobile, Alabama
Sep 2017 – May 2018

Responsibilities:

- Developed user interface using **JSP** Tag libraries, third party libraries and **Java** Script to simplify the complexities of the application and developed the User Interface using **HTML, CSS, jQuery** and Ajax.
- Used AJAX API for intensive user operations and client-side validations.
- Consumed **RESTful** web services using **jQuery** / AJAX to fetch the server data and used **JSON** parsing to render the data in UI.
- Developed application using Struts **MVC** Framework wrote Configuration **XML** file that contains declarations and another dependent object declaration.
- Deployed the **Spring** Boot application in Cloud platform.
- Developed various **Java** beans for the performance of business processes and effectively involved in Impact analysis.
- Worked as a backend developer and developed several REST endpoints to process the **XHTML** documents to import them in the Oracle Database or fetch them using Grails framework
- Written Stored Procedures and SQL scripts both in SQL Server to implement business rules.
- Involved in Bug fixing of various modules that were raised by the testing teams in the application during the Integration testing phase.
- Prepared technical reports & documentation manuals during the program development.
- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Perform or direct web site updates. Write, design, or edit web page content, or direct others producing content.
- Develop and direct software system testing and validation procedures, programming, and documentation.
- Involved in utilizing the CMS solution for creating web applications by designing .Net applications.

**Bajaj Auto Limited
Software Developer**

**Pune, India
June 2014 – Dec 2015**

Responsibilities:

- Involved in design, development and testing phases of the SDLC using Agile Methodology.
- Reduced the Time to deliver the Emails from 10.65 to 2.20 sec in assigned Service Request. This change led to redesign an entire application.
- Worked on High, Medium Priority CR's (Change Request) and SR's (Service Request) for resolution and deployment in to Production Environment as per scheduled releases.
- Developing Use Cases, Sequence Diagrams, Analysis and Design Specification, Unit Testing documents for assigned CR's and SR's in Code Review using Smart bear code collaborator.
- Developed a Customized tool for one of our applications reducing overload on our team.
- Worked on few Migration Projects associated with Application Development which includes implementing JavaScript changes for the IE 11 Migration Project.
- Worked as an On-Call Support Executive for dealing with Production Environment, Major Incidents resolution and Scheduling Jobs Monitor & Control.
- Worked on resolving Test Outages during Integration and Regression Testing phases for deployed CR's and SR's in Test Environment.
- Worked on Analyzing and Querying Splunk tool to determine and resolve possible out flaws occurring the application.
- Developed a Content Repository Website to store documents relevant to Application Description and other Critical Process flows related to applications supported by our team.
- Responsible for Assigning Individual tasks to the team members and providing status updates to the Client in weekly meetings from Offshore.

**Hindustan Shipyard Limited
On Job Training**

**Visakhapatnam, India.
May 2013– Dec 2013**

Responsibilities:

- Coordinate network operations, maintenance, repairs, or upgrades.
- Monitoring Servers and bringing down during Maintenance Time and Implement New IP Scheme for present company and future growth.
- Prepare Engineering Documents and network diagrams to Design, build, or operate equipment.
- Implement, Monitor, Troubleshoot and development of LAN/WAN Infrastructures.
- Tested internet connectivity by checking the DNS entries to the URLs in Windows Server Active Directory.
- Resolved computer related problems such as troubleshooting operating system failure, scheduling and updating virus checks on servers and desktops
- Involved in troubleshooting of DNS, DHCP and other IP conflict problems.
- Created ACLs according to the requirement and taken guidance from seniors in that company.

**Rashtriya Ispat Nigam Ltd
Internship**

**Visakhapatnam, India.
May2012 - June 2012**

Responsibilities:

- Gained Knowledge on Networking and Cabling and Develop network-related documentation. Done troubleshooting of TCP/IP problems and connectivity issues in multi-protocol Ethernet environment.
- Involved with the Team of Data Center Operations to perform duties such as administration and monitoring of Cisco Routers and Switches according to the organization requirements.

**Musicdada.com
Full Stack Developer**

**Guntur, India
Jan 2011 – Jan 2013**

Responsibilities:

- Collaborating with Team, understanding problems and suggesting ideas for Project Development.
- Development and designing Front End pages using HTML, CSS and JavaScript.
- Co-ordinated with Quality Assurance team in executing proposed Test Case Scenarios.
- Designing Use Case Diagrams, Sequence Diagrams, UML Diagrams for proposed requirements.
- Modified existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance.
- Store, retrieve, and manipulate data for analysis of system capabilities and requirements.
- Skilled in Content Management System and Google Analytics and Developed dynamic and interactive website that ensured high traffic, page views, and User Experience.
- Register web sites with search engines to increase web site traffic.
- Created searchable indices for web page contents and renewed domain name registrations.

ACADEMIC PROJECTS:

Project Title: PANOPTIC PM (<http://www.milestonesu.com/>)

Technologies Used: ASP.NET Visual Studio (C#), ADO.NET, JavaScript, SQL Server, HTML5 and CSS3, AJAX, BOOTSTRAP

- Project developed for providing information on project management solutions to new project managers or business owners, students who want to succeed their career in project management.
- We can choose our project range and after providing requirements it will create automated details regarding the project completion time, milestones, budget, success or failure(estimate).
